

NEW: RaLUX® UV-C Stand.

Your health is important to us.

- Free-standing device for air disinfection
- Air, which may contain bacteria such as viruses, is sucked in
- The inside the device air is purified by UV-C radiation
Pathogens such as viruses are killed.
- The sterilized air is ejected back into the room
- This reduces the virus load and thus the risk of infection
- Cleans 10,000 liters of air per hour.
(Breathing volume of one human being around 500 l/h)
