

Operation of Radium RaLED Star Tubes HF

Compatibility list: tested gear for use with RaLED Star for ECG operation.

Luminous flux may deviate more than 10% off specification.
non compatible

RL-T5 HO 49

** tested and proven working at ECG regarded, luminous flux may deviate.

The compatibility list is based upon testing conducted by the manufacturer in a lab simulated environment, and the results can vary in certain field applications due to a number of factors.

Radium does not take over any responsibility, warranty or liability that this results can also achieved by using the devices under other conditions, or when using successor models of the tested devices, or different models of the same manufacturer.

In case of non-observance of the instructions, safety risks like overheating of RaLED Tube(s) or ECG may occur in rare cases.

This lamp is designed for general lighting service (excluding for example explosive atmospheres).

Since only the lamp is replaced there is no constructive modification to the luminaire. This lamp may not be suitable for use in all applications where a traditional fluorescent lamp has been used. The temperature range of this lamp is more restricted.

In cases of doubt regarding the suitability of the application the manufacturer of this lamp should be consulted.

This product includes one LED Tube and one instruction manual.
