## **Bedienungsanleitung**

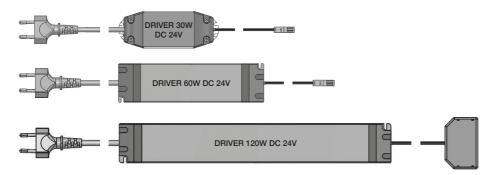

DRIVER 30W DC24V DRIVER 60W DC24V DRIVER 120W DC24V Deutsch OTNA4372 OTNA4373 OTNA4374

Lesen Sie die Anweisung aufmerksam, bevor Sie das Produkt verwenden oder installieren. Bewahren Sie sie zum späteren Nachschlagen auf. Legen Sie die Gebrauchsanweisung bei Weitergabe des Produkts an Dritte bei.

	DRIVER 30W DC 24V	DRIVER 60W DC 24V	DRIVER 120W DC 24V
Artikelnummer	OTNA4372	OTNA4373	OTNA4374
Leitung (W)	0-30	0-60	0-120
Ausgangsspannung (V)	24	24	24
Max. Ausgangsstrom (A)	1,25	2,5	5
Eingangsspannung AC (V)	AC 220-240	AC 220-240	AC 220-240
Frequenz (Hz)	50/60	50/60	50/60
Power Factor	0,9	0,90	0,90
Maße (L x B x H) (mm)	123x44,6x19,2	170x44,5x28,2	316x44,9x33
T <sub>a</sub> max. Umgebungstemperatur (°C)	-20 bis +45	-20 bis +45	-20 bis +45
T <sub>c</sub> max. Oberflächentemperatur (°C)	80	90	85

Der Treiber ist für die Spannungsversorgung von LED-Streifen und kompatiblen Radium Controllern (optionales Zubehör) vorgesehen. Der Treiber besitzt eine elektronische Schutzschaltung, die bei Kurzschluss, Überlastung ausgangsseitig (sekundärseitig) als auch bei Überhitzung abschaltet. Nach Beseitigung der Störung schaltet der LED-Treiber in den normalen Betriebszustand zurück. Schutzart IP20 (Nicht der Feuchtigkeit aussetzen!). Nur im Innenbereich verwenden. 24V LED Strips können sekundärseitig mit einem Controller gedimmt werden (siehe Zubehör).

Die Spannungsversorgung des LED-Streifens darf nur von einer Seite erfolgen.

### Richtige Auswahl eines Treibers

Schritt 1: LED-Leistung addieren

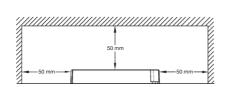

Schritt 2: Treiber mit ausreichend Leistung auswählen (LED-Leistung kleiner gleich Treiber-Leistung)

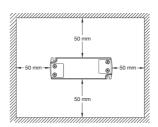

### Beispiel:

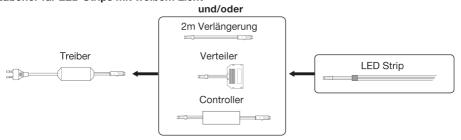

#### Mindestabstände beachten

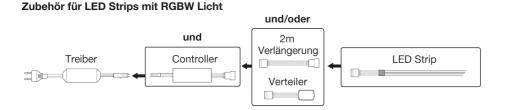

Beachten Sie den Mindestabstand, dieser ist einzuhalten.

### Zubehör für LED Strips mit weißem Licht

## **User Instruction**

DRIVER 30W DC 24V DRIVER 60W DC 24V DRIVER 120W DC 24V English OTNA4372 OTNA4373 OTNA4374

Read the instructions carefully before using or installing the product. Keep them for future reference. Enclose the instructions for use when passing the product on to third parties.

	DRIVER 30W DC 24V	DRIVER 60W DC 24V	DRIVER 120W DC 24V
Article no.	OTNA4372	OTNA4373	OTNA4374
Power (W)	0-30	0-60	0-120

T <sub>c</sub> max. Surface temperature (°C)	80	90	85

The driver is intended for the power supply of LED strips and compatible Radium controllers (optional accessories).

The power supply unit has an electronic protective circuit that switches off in the event of a short circuit, overload on the output side (secondary side) and overheating. Once the fault has been rectified, the LED power supply unit switches back to normal operating mode. Protection class IP20 (do not expose to moisture). For indoor use only.

24V LED Strips can be dimmed on the secondary side with a controller (see accessories).

The LED strip may only be supplied with power from one side.

## More information & languages:

OTNA4372

OTNA4373

OTNA4374

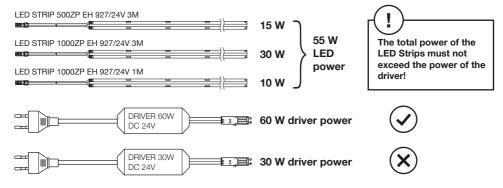

## Correct choice of driver

Step 1: Add LED power

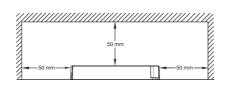

Step 2: Select a driver with sufficient power (LED power less than or equal to driver power)

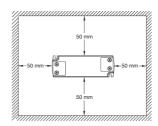

### Example:

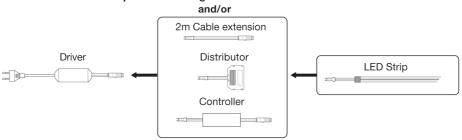

### Observe minimum distance

Observe the minimum distance, this must be maintained.

Le driver est destiné à l'alimentation électrique des strips LED et des contrôleurs Radium compatibles (accessoires en option). Le driver est équipé d'un circuit de protection électronique qui se désactive en cas de court-circuit, de surcharge côté sortie (côté secondaire) ou de surchauffe. Une fois le disfonctionnement éliminé, le driver LED revient à son état de fonctionnement normal. Indice de protection IP20 (ne pas exposer à l'humidité !). À utiliser uniquement à l'intérieur. Les strips LED 24 V peuvent être gradés côté secondaire à l'aide d'un contrôleur (voir accessoires). L'alimentation électrique du strip LED ne doit être effectué que d'un seul côté.

### Plus d'informations et autres langues:

OTNA4372

OTNA4373

OTNA4374

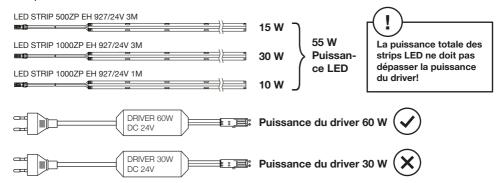

### Choix correct d'un pilote

Étape 1: additionner la puissance des LED

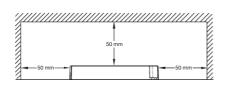

Étape 2: choisir un driver suffisamment puissant (puissance des LED inférieure ou égale à la puissance du driver)

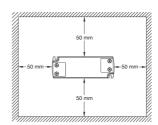

### Exemple:

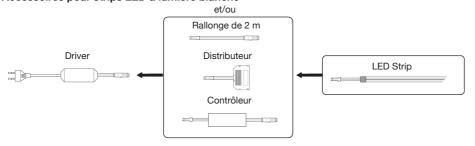

## Respecter les distances minimales

Respectez la distance minimale, celle-ci doit être respectée.

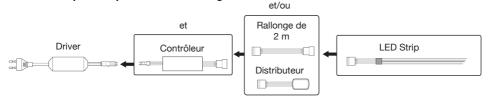

### Accessoires pour strips LED à lumière blanche

## Accessoires pour strips LED avec éclairage RGBW

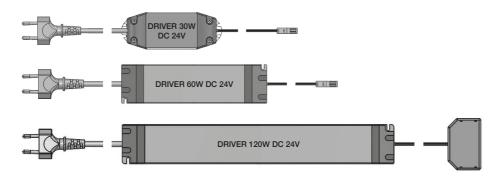

## Istruzioni per l'uso

Il driver è destinato all'alimentazione di strisce LED e controller Radium compatibili (accessori opzionali).
Il driver è dotato di un circuito di protezione elettronico che si disattiva in caso di cortocircuito, sovraccarico sul lato di uscita (lato secondario) e surriscaldamento. Una volta risolto il guasto, l'alimentatore LED torna alla modalità di funzionamento normale. Classe di protezione IP20 (non esporre all'umidità). Solo per uso interno. Le strisce LED a 24 V possono essere regolate sul lato secondario con un controller (vedere accessori). La striscia LED può essere alimentata solo da un lato.

#### Scelta corretta del driver

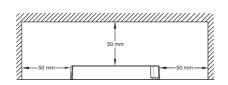

- 1. Sommare la potenza totale delle strisce LED
- 2. Selezionare un driver con potenza sufficiente (potenza LED inferiore o uquale alla potenza del driver)

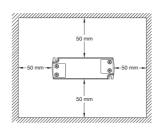

### Esempio:

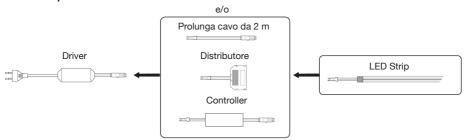

## Rispettare la distanza minima

Rispettare la distanza minima, che deve essere mantenuta.

### Accessori per strisce LED con luce bianca

## Accessori per strisce LED con luce RGBW
